LASER HEAD

LS-QBH-1940-2.10-D20-AW-TM

〉SPECIFICATIONS:

1. System design wavelength band: 1940nm, laser interface QBH.
2. The galvo scanner has an aperture of 20mm.
3. The collimation module features a 28mm aperture, a focal length of F50, and a water-cooled adjustable divergence angle design.
4. Field lens FT-254Q-1940-D20, working distance 314mm, processing range 170x170mm.
5. Equipped with a coaxial temperature measurement module.
